Book overview

Fifty years after his death, the thought of the French scientist and Jesuit Pierre Teilhard de Chardin (1881?1955) continues to inspire new ways of understanding humanity's future. Trained as a paleontologist and philosopher, Teilhard was an innovative synthesizer of science and religion, developing an idea of evolution as an unfolding of material and mental worlds into an integrated, holistic universe at what he called the Omega Point. His books, such as the bestselling *The Phenomenon of Man*, have influenced generations of ecologists, environmentalists, planners, and others concerned with the fate of the earth. This book brings together original essays by leading experts who reflect on Teilhard's legacy for today's globalized world. They explore such topics as: the idea of God and the person; quantum reality and Teilhard's vision; spiritual resources for the future; politics and economics; and a charter for co-evolution.

Popular passages

Love alone is capable of uniting living beings in such a way as to complete and fulfill them, for it alone takes them and joins them by what is deepest in themselves. [Page 68](#)

Appears in 81 books from 1953-2007

We must join together to bring forth a sustainable global society founded on respect for nature, universal human rights, economic justice and a culture of peace. Towards this end, it is imperative that we, the peoples of Earth, declare our responsibility to one another, to the greater community of life and to future generations. [Page 74](#)
