Resources for Simple Living

Below are some suggested resources on simple living which have been helpful to Jesuit volunteers in the past.

Books

► **Simplicity: The Art of Living** by Richard Rohr, OFM. "God's redemption of history seems so utterly slow and ineffective, and even impeded by the Church politic." How do we find that deeper place of peace which the world, and sometimes the people who care for us, cannot always give?

► **Rich Christians in an Age of Hunger** by Lee Sider. This is a very challenging and readable book filled with facts and figures about global greed and waste. Lee Sider offers a very challenging thoughts and suggestions for living gospel simplicity

► **Freedom of Simplicity** by Richard Foster. Explores the value of simplicity from a biblical and experiential perspective.

► **Living Simply in an Anxious World** by Robert J. Wicks. Wicks defines living simply as focusing one's perspective in order to become aware of God's action in one's life.
